

AT&T Fellows Overview

The AT&T Fellows program (formally SBC Fellows program) provides support for faculty demonstration projects in the effective integration of information technology for campus and distance education. As faculty at Indiana University explore the growing emphasis on technology enhanced instruction, the call for participation will be to encourage the sophisticated and thoughtful use of technology to enhance teaching and learning. Specifically, this round of the AT&T Fellows Program is intended to encourage faculty to examine and develop innovative methods of teaching and learning that will maximize the power and flexibility of Indiana University's learning environment. This learning environment includes the following:

- Oncourse Collaboration and Learning (CL) environment for improved student learning
- Newly developed learning spaces and wireless technologies to expand the learning environment
- ePortfolio as a means to document and enhance student learning
- Multi-campus collaboration with colleagues to extend the capability of Indiana University's learning environment

Grant Type/Deadline	Purpose	Amount	Terms of Eligibility
Preparing for Innovation <i>May 16, 2005</i>	Codevelopment of best practices for solving complex issues associated with moving course materials from Oncourse Classic to Oncourse CL while considering the opportunities of the new application. Successful candidates will work closely with IT staff to develop strategies for and documentation of effective transition to Oncourse CL.	Up to \$2,500	All fulltime faculty at Indiana University are eligible. Adjunct and parttime faculty must be able to demonstrate successful and engaged use of Oncourse Classic.
Examining Innovation <i>September 19, 2005</i>	Conduct applied research on instructional strategies using one or more of IU's learning environments (see above) and advocate for technology innovation. Successful candidates will contribute to the IU good practices database, submit their results to an appropriate journal or other outlet, and make campus presentations.	Up to \$5,000	All fulltime faculty at Indiana University are eligible. Adjunct and parttime faculty must be able to demonstrate a successful and sustained teaching record at IU.
Implementing Innovation <i>January 9, 2006</i>	Create and implement innovative, multidisciplinary uses of one or more of IU's learning environments (see above) to enhance student learning. Successful candidates will contribute to the IU good practices database, submit their work to an appropriate outlet, and make campus presentations.	Up to \$15,000	All fulltime faculty at Indiana University are eligible. Adjunct and parttime faculty must be able to demonstrate a successful and sustained teaching record at IU. Proposals from teams are also encouraged with one faculty member (usually the program director) to be identified as the Principle Investigator and additional team members as project investigator(s).
